

Onboarding Guide: Comprehensive System Implementation

Section 1: Welcome and Overview

This system empowers teams to make data-driven decisions across collections, products, stores, and employees. It integrates seamlessly into the brand's infrastructure to optimize performance and accountability.

Section 2: System Features

- Collection Report Cards: Track collection-level sales, aging, and CAC.
- Product-Level Metrics: Monitor performance for individual products.
- Store Dashboards: Track store-level performance, inventory, and CAC.
- Employee Metrics: Understand individual contributions and incentives.

Section 3: Role-Specific Use Cases

For Managers:

- Monitor store and team performance.
- Improve CAC, aging, and sales metrics.

For Employees:

- Track individual contributions and maximize incentives.

For Analysts:

- Use advanced analytics for demand forecasting and pricing strategies.

Section 4: Step-by-Step Instructions

- Login and Access: How to access the system and dashboards.

Onboarding Guide: Comprehensive System Implementation

- Using the Dashboards: Navigate collection, product, store, and employee views.
- Updating Data: Input or edit data when required.

Section 5: Troubleshooting and Support

Common issues:

- Login errors: Contact the IT department.
- Data discrepancies: Reach out to the system champion.
